

11th international conference on research in high magnetic fields

RHMF 2015

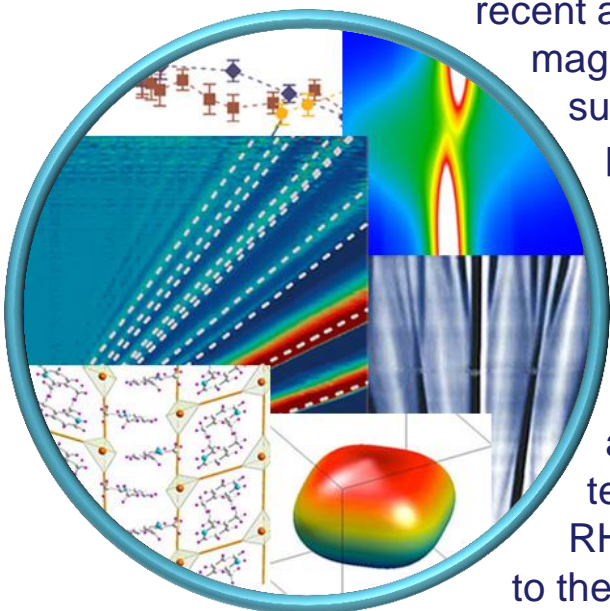

Grenoble, 1st – 4th July 2015

The 11th international conference on research in high magnetic fields

is hosted by the Laboratoire National des Champs Magnétiques Intenses, in Grenoble, and follows meetings held in Wuhan (2012), Dresden (2009), Sendai (2006), Toulouse (2003), Porto (2000), Sydney (1997), Nijmegen (1994), Amsterdam (1991), Leuven (1988) and Osaka (1982). The conference is devoted to all aspects of

recent advances of research in high magnetic fields, and covers areas such as magnetism, semiconductor physics, superconductivity, studies of strongly correlated electron systems, low-dimensional materials, nano-objects, molecular systems, as well as high-magnetic-field technology and new high-field experimental techniques.

RHMF2015 is a satellite conference to the 20th International Conference on Magnetism ICM 2015 in Barcelona.
